Collier Health Services, Inc. Receives Award from The Community Foundation of Collier County

Collier County Florida, January 26, 2006 - Collier Health Services, Inc. recently received the **2006 Harvey Kapnick Award** from the Community Foundation of Collier County.

Each year, the Community Foundation of Collier County recognizes an outstanding Collier County nonprofit organization with the Harvey Kapnick Award for demonstrating discerning leadership, sound management, and a commitment to achieving results.

In particular, this award is given to CHS for the introduction of and successful operation of the Ronald McDonald Care Mobile Program in Collier County. The Community Foundation recognizes the extraordinary results that we have achieved in building this program to support health care for low-income children in our county.

Introduced in November 2004, the Care Mobile offers dental/medical screenings, growth and development screenings, preventative and restorative dental treatments, and new school physicals for our community's underserved children. To date, the Ronald McDonald Care Mobile Program has touched the lives of 5,000 children.
